

NMR of Paramagnetic Substances

Ivano Bertini and Claudio Luchinat

Contents

<i>Preface</i>	ix
Chapter 1 <i>Introduction</i>	1
Chapter 2 <i>The hyperfine shift</i>	29
Chapter 3 <i>Relaxation</i>	77
Chapter 4 <i>Hyperfine shift and relaxation in the presence of chemical exchange</i>	111
Chapter 5 <i>Magnetic coupled systems</i>	131
Chapter 6 <i>Nuclear Overhauser effect</i>	163
Chapter 7 <i>Two-dimensional spectra and beyond</i>	185
Chapter 8 <i>Considerations on high resolution solid state NMR in paramagnetic molecules</i> (S. Aime, I. Bertini and C. Luchinat)	221
Chapter 9 <i>Hints on experimental techniques</i>	243
Appendix I <i>NMR properties of nuclei</i>	266
Appendix II <i>Derivation of the equation for contact shift</i>	270
Appendix III <i>Derivation of the pseudocontact shift in the case of axial symmetry</i>	272
Appendix IV <i>Derivation of the equations related to NOE</i>	275
Appendix V <i>Simulation of NMR spectra (I. Bertini, C. Luchinat and A. Rosato)</i>	278
Appendix VI <i>Reference tables</i>	290
<i>Subject index</i>	293
